SUMMARY

Senior full-stack engineer with 8 years building web products, now leading the engineering team at Themefisher, whose five product brands serve 120,000+ developers and businesses. I own technical architecture across those brands and work hands-on from data model and API design through to deployment in TypeScript, Next.js, Astro, React, Node.js, PostgreSQL and MongoDB. Lead maintainer of Sitepins, an open-source Git-based headless CMS, and of the Hugoplate, Astroplate and Nextplate starter frameworks, which carry 3,500+ GitHub stars between them.

SCALE OF THE WORK I LEAD, DELIVERED WITH MY TEAM

- 1.4M+ downloads across the theme catalogue we build and maintain
- 120,000+ developers and businesses using products we have shipped
- 3,500+ GitHub stars across the open-source projects I lead and maintain
- 95+ PageSpeed floor I set and enforce on everything we ship

EXPERIENCE

Themefisher

Senior Full-Stack Engineer & Engineering Lead · Dhaka, Bangladesh · Jun 2018 – Present

Five brands under one company: Themefisher · GetHugoThemes · Statchunt · Zeon Studio · Sitepins

- Own technical architecture across all five brands and lead a development team of 5+ engineers within a 15-person organisation: code review, release standards, mentoring, and a 95+ PageSpeed floor enforced on everything shipped.
- Build production applications end-to-end in TypeScript, Next.js, Astro, React and Node.js, covering data modelling, REST API design, authentication and role-based access, deployment on AWS and CI/CD pipelines.
- Drove the company's shift from selling static themes to building products, adding an open-source headless CMS, an agency arm and internal tooling to a business that previously shipped templates only.

Sitepins · open-source Git-based headless CMS · Lead maintainer, 2024 – Present

- Lead development of a self-hostable, Git-based CMS for Astro, Next.js and Hugo with a hosted cloud tier, owning architecture, content model and release process.
- Designed a zero-config content model that infers schema directly from existing Markdown and frontmatter, removing the manual schema-definition step every competing Git-based CMS requires.
- Built the auth and collaboration layer: GitHub/GitLab OAuth, invite-based roles that let non-technical editors publish safely, commit-backed edits and one-click rollback.

Zeon Studio · client delivery and open-source starters · Team Lead, 2022 – Present

- Lead client delivery end-to-end for web applications, marketing sites and legacy-platform migrations on Astro, Next.js and Hugo, from scoping through launch and handover.

- Maintain Hugoplate, Astroplate and Nextplate, the open-source starters the agency and wider community build production sites on, with 3,200+ combined GitHub stars.
- Built OpenHR, an open-source HR platform now running the company's own HR operations.
- Built GoHighLevel middleware: n8n and Telegram bridges wiring marketing automation into client CRMs, replacing manual handoffs between the two systems.

Themefisher & GetHugoThemes · premium theme catalogue · 2018 – Present

- Build and maintain premium themes across Hugo, Astro, Next.js, Jekyll, TailwindCSS and Bootstrap, contributing to a team-built catalogue downloaded 1.4M+ times.
- Own front-end architecture and build tooling across the catalogue: Hugo modules, shared build pipelines and the TailwindCSS v4 migration.

Statichunt · Jamstack theme and tool directory · 2022 – Present

- Built and maintain the platform end-to-end in Next.js, Node.js and MongoDB, covering schema design, search and filtering, and the submission pipeline for an open directory of Jamstack themes and tools.

SELECTED OPEN SOURCE

Hugoplate · Hugo + TailwindCSS starter framework, the base for thousands of production sites · **1.5k+ stars**

Astroplate · Astro + TailwindCSS + TypeScript starter framework · **1.2k+ stars**

Nextplate · Next.js + TailwindCSS starter framework · **500+ stars**

HuggingFace Spaces toolkit · run always-on AI agents, n8n automation and schedulers free on HuggingFace Spaces · **250+ stars**

somrat-hugo-theme · Hugo portfolio theme used by hundreds of developers · **140+ stars**

Sitepins · open-source Git-based headless CMS for Astro, Next.js and Hugo · **130+ stars**

OpenHR · open-source HR platform, now running Themefisher's own HR operations

github.com/somratpro · 400+ stars across personal repositories · 90+ followers

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, SCSS

Backend & Data: Node.js, REST API design, PostgreSQL, MongoDB, Supabase, OAuth and role-based access control

Frontend: React, Next.js, Astro, TailwindCSS, MDX, Bootstrap

Static & Jamstack: Hugo, Jekyll, Git-based CMS, headless content modelling

Cloud & Tooling: AWS, S3, Docker, Git and GitHub, CI/CD, n8n, GoHighLevel API

Engineering practice: Architecture and technical direction, code review, mentoring, Core Web Vitals, accessibility, technical SEO

Languages spoken: Bengali (native), English (professional working proficiency)

EDUCATION

BSc, Computer Science & Engineering, Bangladesh University · 2019 – 2022 · CGPA 3.76 / 4.00

Diploma in Computer Engineering, Bogra Polytechnic Institute · 2014 – 2018 · CGPA 3.15 / 4.00
