SUMMARY

Senior full-stack engineer, **8 years**, building web products used by **120,000+ developers and businesses** worldwide. I lead the engineering team at Themefisher — hands-on across Astro, Next.js, React and Node.js — and maintain **Sitepins**, an open-source Git-based headless CMS. Projects I lead have earned **3,500+ GitHub stars**.

EXPERIENCE

Senior Full-Stack Engineer & Dev Team Lead

Jun 2018 – Present

Themefisher · Dhaka, Bangladesh

Five brands under one company: **Themefisher** · **GetHugoThemes** · **Statchunt** · **Zeon Studio** · **Sitepins**

- Build production web applications across all five brands in **Next.js, Astro, React, Node.js, MongoDB and PostgreSQL** — from data modelling and API design to deployment.
- Own technical architecture and lead the engineering team — code review, release standards, mentoring, and a **95+ PageSpeed minimum** on everything shipped.
- Drove the move from selling static themes to building products — an open-source headless CMS, an agency arm and internal tooling.

Sitepins — Dev Team Lead & Core Maintainer

2024 – Present

- Lead development of an **open-source, Git-based headless CMS** for Astro, Next.js and Hugo — self-hostable, plus a hosted cloud tier.
- Designed a **zero-config content model** that infers schema from existing Markdown and frontmatter — the manual setup step every competing Git-based CMS requires.
- Built commit-backed editing with GitHub/GitLab OAuth, invite-based roles for non-technical editors and one-click rollback.

Zeon Studio — Dev Team Lead

2022 – Present

- Lead client delivery: web apps, marketing sites and legacy-platform migrations on Astro, Next.js and Hugo.
- Maintain the open-source starters the agency and community build on — **Hugoplate, Astroplate and Nextplate** — the base for thousands of production sites.
- Built **OpenHR**, an open-source HR platform now used to run the company internally.
- Built GoHighLevel middleware — n8n and Telegram bridges connecting marketing automation to client CRMs.

Themefisher & GetHugoThemes — Senior Full-Stack Engineer

2018 – Present

- Build and maintain premium themes across Hugo, Astro, Next.js, Jekyll, TailwindCSS and Bootstrap — a catalogue downloaded **1.4M+ times**.
- Own front-end architecture and build tooling — Hugo modules, TailwindCSS v4 migration, shared build pipelines.

- Built and maintain the platform end-to-end in **Next.js, Node.js and MongoDB** — an open directory of Jamstack themes and tools.

SELECTED OPEN SOURCE

LED AT ZEON STUDIO & SITEPINS (TEAM PROJECTS)

Hugoplate	Hugo + TailwindCSS starter template	1.5k+★
Astroplate	Astro + TailwindCSS + TypeScript starter	1.2k+★
Nextplate	Next.js + TailwindCSS starter	500+★
Sitepins	Open-source Git-based headless CMS	130+★

PERSONAL PROJECTS

HuggingFace Spaces toolkit	Run always-on AI agents, n8n automation and schedulers free on HuggingFace Spaces	250+★
somrat-hugo-theme	Hugo portfolio theme used by hundreds of developers	140+★

github.com/somratpro — 400+★ earned across personal repositories · 90+ followers

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, HTML, CSS, SCSS
Frontend	React, Next.js, Astro, TailwindCSS, Bootstrap, MDX
Static & Jamstack	Hugo, Astro, Jekyll, Git-based CMS and headless content modelling
Backend & Data	Node.js, REST APIs, PostgreSQL, MongoDB, Supabase
Cloud & Tooling	AWS, S3, Git / GitHub, CI/CD, n8n, GoHighLevel API
Practice	Team leadership, code review, architecture, Core Web Vitals, technical SEO, accessibility, UX
Spoken	Bengali (native), English (professional working proficiency)

EDUCATION

BSc, Computer Science & Engineering — Bangladesh University CGPA 3.76 / 4.00	2019 – 2022
Diploma in Computer Engineering — Bogra Polytechnic Institute CGPA 3.15 / 4.00	2014 – 2018
